PROFILE

Fullstack developer with 6+ years building and maintaining production web applications. My focus is frontend with **React, Next.js and TypeScript**, backed by server-side work in **Node.js (NestJS / Express)** and PHP.

I've worked across markets (payments and insurance in Chile, a global advertising platform, telecom), shipping features, integrating APIs and working with PostgreSQL. I care about quality through unit tests, static analysis and solid practices, in agile and remote teams.

EXPERIENCE

Fullstack Developer · Kibernum
Oct 2026 – Present

Santiago, Chile · Client: SBPAY

- Service updates and integrations for SBPAY's website and service orchestrator.
- Service orchestrator built with Node.js, Express and TypeScript.
- Website in PHP (Themosis on WordPress) and JavaScript.
- Unit tests and technical documentation for every change.

Node.js · Express · TypeScript · PHP · Themosis · WordPress · JavaScript · Unit testing

Software Engineer · ACL – Vida Cámara
Jul 2025 – Jan 2026

Santiago, Chile

- Built features and fixes for the health-insurance policy issuance flow, across frontend and backend.
- Created NestJS endpoints and integrated them on the frontend, contributing to business logic and service-to-service communication.
- Worked with PostgreSQL, and with MongoDB in some data flows.
- Unit tests for every change; static analysis with SonarQube and linters; built on a design system.

React · TypeScript · NestJS · PostgreSQL · MongoDB · SonarQube · Jira

Frontend Developer · Logicea
Jul 2023 – Apr 2025

Greece (remote)

- Maintained and evolved a global platform for buying and analyzing advertising space.
- Fixed bugs, shipped new features and adapted features to regional requirements.
- Defined data structures and JSON responses with the backend team; integrated APIs.
- Built an Excel report export module in Node.js; maintained unit tests.
